

**IN THE CLAIMS**

Please amend claim1, as follows:

1. (Once Amended)            A telecommunications messaging system,  
2 comprising:
  - 4            a wireless subscriber unit;
  - 6            a base station in a first communication with said wireless subscriber unit;  
and
  - 8            a mobile switching center for causing said base station to engage in  
service negotiation with said wireless subscriber unit, said service negotiation for  
determining a service configuration for a second communication between said  
base station and said wireless subscriber unit.
